DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance: The prior art shows a rotor structure for a stepping motor with a magnet with a first annular wall, a magnet holder with a base and a second annular wall connected to the first annular wall for fixing the magnet and a shaft having one end mounted through the base of the magnet holder. However, the prior art fails to show, in combination with the invention, a stopper for supporting and fixing the other end of the shaft and the stopper being fixedly positioned along the shaft in one location within a range of possible locations to maintain a relatively low rotational inertia and the location corresponding to the length of the magnet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
